B 24. Digitalization and practices of inclusion (2 ECTS)

Norwegian title: Digitalisering og inkluderende praksiser (2 studiepoeng)

Course description/Emnebeskrivelse

New technologies are developed and implemented to solve a range of tasks in society, and digitalization processes exist in various contexts and forms. Technology is used to facilitate participation in different arenas, from mHealth and mobile banking services to improve living conditions, to robot pets intended to improve elderly care and dementia patients' care. Digitalization is often considered as the solution to several problems, but how does this play out in the practical use of technology? Is the focus on hardware and software or on the human and social systems (cf. Warschauer 2003, p. 6)? In this cross-disciplinary PhD course, we focus theoretically and empirically on digitalization and practices of inclusion. We invite a wide range of approaches, including digital Bildung, critical digital literacy, multilingualism, and linguistically diverse practices. Other perspectives are also welcome. There will be guest lectures by Professor Emeritus Jim Cummins and Professor Ingeborg Kränge.

The concept of inclusion encompasses policies or ideologies "used by governments and other policymakers to change or improve schools, workplaces, housing, or other community institutions so as to adjust them to meet human diversity, and in particular, to embrace people who experience exclusion" (Hualand 2017, p. 317). The concept is not unproblematic; who should "be included" and who is responsible for this inclusion, into what? In this PhD course, we investigate practices of inclusion critically, examine and discuss empirical work and theoretical approaches in studies of technology's role in practices of inclusion. Inclusion is thus considered as social practice, related to digitalization processes, and is viewed from different theoretical perspectives, with a focus on educational contexts and linguistic aspects of inclusion (Krüger et al. 2021, etc.). What expectations do we have to technology and how do these affect our practices? How are digital tools used for practices of inclusion and do they lead to experienced inclusion? Does the supposition that "everyone" has access to technology and digital literacy prevent participation and lead to exclusionary practices, accompanying digital exclusion (Helsper and Reisdorf 2017)? How do persistent inequalities and global dynamics shape practices (Deumert 2014)? What experiences can we draw from digital practices during the covid-19 lockdowns (Bucholz et al. 2020)?

<i>Type of course</i>	Optional course in B: Courses in theoretical perspectives
<i>Responsible for the course</i>	Researcher, PhD Kristin Vold Lexander Associate professor Jessica B. P. Hansen, Østfold University College
<i>Content of the course</i>	<ul style="list-style-type: none"> - Theories of inclusion and digitalization related to studies of digital literacy practices - Research ethics - Research reviews and scientific ground - Oral presentation and discussion of a topic relevant to own PhD project
<i>Learning outcomes</i>	<p><i>On completion of the course, the PhD candidates shall have achieved the following learning outcome:</i></p> <p><i>Knowledge:</i></p> <ul style="list-style-type: none"> - Have advanced systematic knowledge into theoretical approaches to digitalization and inclusion - possess insight into central problems of digitalization and inclusion in various contexts <p><i>Skills:</i></p> <ul style="list-style-type: none"> - can assess and critically analyze inclusion as a concept and ways in which digitalization is aimed at inclusion <p><i>Competence:</i></p> <ul style="list-style-type: none"> - have acquired a basis for contributing to the field - know and be able to critically discuss the state-of the-art on digitalization and inclusion research related to own PhD project
<i>Mandatory activity/ "Arbeidskrav"</i>	<ul style="list-style-type: none"> - Participation at the seminars
<i>Assessment</i>	<ul style="list-style-type: none"> - An individual seminar presentation (20 min) on the seminar topic related to own PhD project. Evaluated as either 'pass' or 'fail' (bestått , ikke bestått).
<i>Organization</i>	<ul style="list-style-type: none"> - Seminar, 2 days (Hamar)

<i>Credits</i>	2 credits
<i>Syllabus</i>	Approximately 400 pages – out of which 180 pages are to be chosen individually (see list for suggestions). The individual syllabus must include a research review of a topic relevant for own dissertation, and other relevant articles.

Reading list: 400 pages, including 220 pages of own choice.

Inclusion (180 p, compulsory reading)
