

## AR, VR and AI: Potential and Possibilities

Department of Game Development, the Game School in collaboration with Centre for Lifelong Learning, offers a **free online** course in **virtual/extended reality (AVR)** and **artificial intelligence (AI)**.

The course is open to all who are interested utilizing digital technology in the professional realm.

An optional exam is available, offering 7.5 credits.

The course guides you on how to implement this technology, focusing on its potential and possibilities.

**The course contains of five modules:**

- Seeing the big picture
- What your business needs to know about VR
- What your business needs to know about AR
- Demystifying AI
- The next step

The course is conducted in English, with subtitles in both English and Norwegian for the videos. A lot of emphasize is placed on visual presentation.

**Practical information:**

- Flexible implementation of the course
- Optional exam for credits
- More information about enrolling at:

**[www.avr-ai.no](http://www.avr-ai.no)**

\*To do the exam, there is a charge of 7900 Nkr, including term fee.  
Requirement for enrolling is higher education entrance qualification.
